

Starlight Essence January 2019

110 Divine Vision

This essence brings you into contact with divine visions which exist completely untouched by time and space and beyond all ideas, wishes or opinions. It is one of the greatest gifts to be able to dive into this level. Each divine vision is perfect and complete, granting insights into your divine plan and the purpose, goals and tasks of your divine being. The essence lets you dive into the divine dream of creation which has an importance for your own world and your life. This is where your own creation levels start to communicate and unfold.

Through this divine essence, these visions can be experienced through your earthly form, and then made manifest. Words are too limited to describe the completeness and perfection of divine visions. When you open yourself up to them and allow yourself to be touched by their purity, beauty and perfection, they fill your heart with joy; and then head for manifestation.

Daily application in January:

1. Hold the essence with your arm stretched above your head for a while.
2. Place one drop each onto the lotus, heart and brow chakra.
3. Hold the essence with your arm stretched in front of your throat chakra. From there you slowly bring the essence toward your throat chakra (astral), hold it there and then move the essence clockwise around your throat.
4. Rub three drops of the essence between your hands and stretch them out in front of your brow chakra. From there you bring them slowly to your forehead (astral) and from there to your temples (astral), where you hold them for a while. Then move them slowly toward the back of your head (astral) and hold them there. Finally move your hands back to your forehead and hold them there for a while.
5. Place one drop each onto the shoulder points (GB 21) and into the mouth.
6. Linger in silence for 5 – 10 minutes.
